BCAS: Health & PE Edition

Read to learn all about the good stuff happening in the Health & PE Department this year.

New Health Curriculum

For our health curriculum, we've continued to evolve our lessons by learning about the usual suspects: Drugs/Alcohol, Sexual Education, Exercise & Fitness etc. However, we've tapped in to a few other subjects that transcend the status quo curriculum with subjects like The Science of Character. Our school won the National School of Character award last year through our positive school climate and culture, and having our students recognize their own strengths helps reinforce what these students have accomplished.

New PE Equipment

This school year has seen a noticeable makeover from the previous one. We've purchased all new, state-of-the-art gym equipment that encourages students to move. From our indoor hockey equipment, badminton, and our two Spalding basketball hoop systems, there is always something that can promote health through fun!

Drivers' Permits Issued All Year Long!

Lastly, we've had 12 students pass their NJ State Permit Test this year at school. They worked vigorously and with focus and to prep for their tests in which they must score and 80% to pass. They may or not use Algebra II after they graduate (just kidding math teachers!), but the vast majority will be driving the rest of their lives! This is why we take pride in our young people putting their energy and focus towards something so important.

Words from a New Driver:

***“If you follow the rules
and pay attention
during Matt’s classes,
then you’ll pass the
written test.”
- Alaina Q.***

If you take Matt’s
Driver’s Ed and study
the book, you’re sure to
get your blue card!
